

Wirelessnet

Mobile network in a box

WirelessNet is a WiFi network server that makes it easy to pack up the entire office network and take it on the road. The system is small enough to fit into a briefcase, light enough to take anywhere, yet powerful enough to wirelessly connect all your office computers.

Features include:

- ▶ *Shared wireless Internet access*
- ▶ *Secure access to files, websites and e-mail*
- ▶ *Simple web based management and applications*
- ▶ *Local Intranet website hosting*

WirelessNet is the complete **wireless network in a box** capable of forming an instant network, while sharing an Internet connection with WiFi enabled computers. The system features secure centralized storage, backup of critical data along with other useful server functions including web caching and filtering.

Additionally, the user configurable firewall guards against unwanted intrusions while connected to the Internet. The system is ideal for mobile professionals, consulting groups, remote or small offices, offsite meetings, education or training groups, and tradeshow.

Typical Applications

- Offsite or temporary training locations
- Consultant workgroup Internet and file sharing
- Sharing Internet access connections
- Business presentations
- Tradeshow Internet and e-mail access
- Presentations using locally hosted websites
- Temporary wireless website hosting
- Special event information centers

Questions and Answers

- ▶ **Q. Why use a WirelessNet?**

A. Mobile computer users can share an Internet connection and files with firewall security. You can access local websites or databases without an Internet connection.
- ▶ **Q. What type of computers can be used with WirelessNet?**

A. All IEEE 802.11b/g wirelessly enabled desktop, laptop, tablet computers.
- ▶ **Q. How are software updates done on the WirelessNet system?**

A. New software installations or updates to websites, and databases are performed using the integrated CD-ROM drive, or optional DVD drive.
- ▶ **Q. What are the system requirements of the WirelessNet?**

A. All that is required is 110-volt AC power or 12 volt DC power.
- ▶ **Q. Where can WirelessNet systems be purchased?**

A. Systems can be purchased directly from IR Data Corporation at the address indicated below. Contact our Sales department for ordering information.
